***General Petraeus Wears a Flightcom Headset on the Cover of Newsweek*****Flightcom Military System Supports Central Command Communication**

July 21, 2011, Portland, OR – Flightcom, a leader in innovative team communication solutions for aviation environments, announced today that the photograph on the cover of this week's *Newsweek* depicts General David Petraeus wearing a Flightcom E-13 headset. The cover photograph can be viewed on [the photographer's website](#).

Hundreds of thousands of pilots and military personnel, including those in Central Command, rely on Flightcom systems, including [aviation headsets](#) for ground support, as well as [in-flight headsets](#) for clear communication and hearing protection during mission-critical operations.

“Seeing General Petraeus on the cover of *Newsweek* wearing a Flightcom headset is a proud moment for the entire team,” Executive Vice President Reed Stager said. “Flightcom has been working to extend its presence in the military market and we're thrilled to be supporting our armed forces, making them safer and helping them communicate more effectively.”

Flightcom's military communication systems connect flight crews and ground support teams with continuous hands-free full-duplex communication via wired or wireless systems. They can be configured to support and interface with multiple existing communication systems, including intercoms and a wide variety of radios. Flightcom headsets offer up to 24dB-26dB of hearing protection to prevent hearing damage in noisy aircraft or flight line operations.

**About Flightcom**

Flightcom has been a leading worldwide supplier of rugged and reliable team communication systems for aviation environments since 1983. Flightcom is a division of Sonetics Corporation, which provides customers with trusted and proven team communication solutions for general aviation, military operations, fire and rescue, emergency response, marine applications, public safety, public works, construction and other highly demanding work environments.
