Flightcom® Signs EDMO as Military Distributor

Portland, Oregon - Flightcom and EDMO Distributors, Inc. have recently signed a partnership agreement relating to the promotion of the Flightcom military headset line. Flightcom General Manager Chuck Albert recently said “*EDMO has provided great support to our General Aviation dealer network, and we know that our military customers will also appreciate the EDMO commitment to customer service*”.

Flightcom Corporation is celebrating its 20th year as a manufacturer of headsets and intercom systems for aviation and fire/rescue markets. The three primary products in the Flightcom military product line include:

- **The New E-13 Headset:**

A comfortable and durable utility headset that meets the specific requirements of aircrew and the people that maintain aircraft,

- **The ANR E-13 Headset:** A new design offering ANR (active noise reduction) in a rugged classic style headset, for use by aircrews and maintenance personnel, and
- **The Denali® ANR:** A new approach to headset design that uses light weight composite materials to define a new level of comfort and performance. This headset is a great new alternative for flight deck personnel that fly long missions.

Flightcom's New Denali ANR, with 5 ohm Low Impedance Mic.

Flightcom ANR headsets have been tested by USAF Air Mobility Command, Electronic Systems Command, and the Air Force Research Lab at WP-AFB. Aircraft where Flightcom headset compatibility has been verified include C-130, C-130J, AWACS, C-5, C-141, UH-1, C-21 and KC-135s.
